

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

Generational Chad

\$GenChad

17/05/2023

TOKEN OVERVIEW

Fees

- Buy fees: 10%
- Sell fees: 10%

Fees privileges

- Can't change fees

Ownership

- Owned

Minting

- No mint function

Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and max wallet amount

Blacklist

- Blacklist function not detected

Other privileges

- Can exclude / include from fees
-

DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy (RUG or Honeypot etc)

INTRODUCTION

FreshCoins (Consultant) was contracted by **Generational Chad** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0xA06a68221d161B6D2CB1a7257F8c2d15e9BcFC28

Network: **Binance Smart Chain (BSC)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **17/05/2023**

AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Passed
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Passed
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

OWNER PRIVILEGES

- **Contract owner can't mint tokens after initial contract deploy**
- **Contract owner can't exclude an address from transactions**
- **Contract owner can exclude wallet from tax**

```
function excludeFromFees(address account, bool excluded) external onlyOwner {  
    require(!_isExcludedFromFees[account] != excluded, "Account is already set to that state");  
    _isExcludedFromFees[account] = excluded;  
  
    emit ExcludeFromFees(account, excluded);  
}
```

- **Contract owner can exclude wallet from dividends**

```
function excludeFromDividends(address account) external onlyOwner {  
    require(!excludedFromDividends[account]);  
    excludedFromDividends[account] = true;  
  
    _setBalance(account, 0);  
    tokenHoldersMap.remove(account);  
  
    emit ExcludeFromDividends(account);  
}
```

- **Contract owner can change swap settings**

```
function setSwapTokensAtAmount(uint256 newAmount) external onlyOwner {  
    require(newAmount > totalSupply() / 100_000, "SwapTokensAtAmount must be greater than 0.001% of total supply");  
    swapTokensAtAmount = newAmount;  
}
```

- **Contract owner can withdraw tokens from smart contract**

Native tokens excluded

```
function claimStuckTokens(address token) external onlyOwner {  
    require(token != address(this), "Owner cannot claim native tokens");  
    if (token == address(0x0)) {  
        payable(msg.sender).transfer(address(this).balance);  
        return;  
    }  
    IERC20 ERC20token = IERC20(token);  
    uint256 balance = ERC20token.balanceOf(address(this));  
    ERC20token.transfer(msg.sender, balance);  
}
```

● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {  
    _transferOwnership(address(0));  
}
```

● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {  
    require(newOwner != address(0), "Ownable: new owner is the zero address");  
    _transferOwnership(newOwner);  
}  
  
function _transferOwnership(address newOwner) internal virtual {  
    address oldOwner = _owner;  
    _owner = newOwner;  
    emit OwnershipTransferred(oldOwner, newOwner);  
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

TOKEN DETAILS

Details

Buy fees: 10%

(A total of 420,000,000,000,000,000.00 tokens held by the top 10 accounts from the total supply of 420,000,000,000,000,000.00 token)

Rank	Address	Quantity (Token)	Percentage
1	0x041484b2ac5712b7961e02da4388503f60ddf9c4	390,588,600,000,000,000	92.9973%
2	Pinksale: PinkLock V2	29,411,400,000,000,000	7.0027%

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
