

# SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

**HalloweenFloki**  
\$HalloweenFloki

**28/10/2023**

# TOKEN OVERVIEW

---

## Fees

- Buy fees: 2%
- Sell fees: 2%

## Fees privileges

- Can't change fees

## Ownership

- Owned

## Minting

- No mint function

## Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and / or max wallet amount

## Blacklist

- Blacklist function not detected

## Other privileges

- Can exclude / include from fees
  - Contract owner has to call `setIsOpen` function to enable trade
-

# DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy ( RUG or Honeypot etc )

# INTRODUCTION

**FreshCoins** (Consultant) was contracted by **HalloweenFloki** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

**0x845e9E2a44D12031b75716df0298a5B07009c081**

Network: **Ethereum (ETH)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **28/10/2023**

# AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Low
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Low
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

# OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy
- Contract owner can't exclude an address from transactions
- Contract owner can exclude/include wallet from tax

```
function setExcludedFromFees(address user,bool bools)external onlyOwner{
    _isExcludedFromFees[user] = bools;
}
```

- Contract owner can whitelist wallet

```
function setIsAdmin(address admin,bool bools)external onlyOwner(){
    isAdmin[admin] = bools;
}
```

- Contract owner has to call `setIsOpen` function to enable trade

Please note that any wallet whitelisted or owner retains the ability to engage in trading, even in situations where trading is disabled

```
function setIsOpen(bool bools)external onlyOwner(){
    require(!isOpen,"Is opened");
    isOpen=bools;
}

in transfer function line 867
.
.
.
if(!isOpen&& from != owner() && to != owner())&&!isAdmin[from]&&!isAdmin[to]){
    require(false, "Is not open");
}
.
.
.
```

- Contract owner can change `market` address

Current value:

**market:** `0xc73E454b3223aE1d14EE00e1d6aB096a6831872c`

```
function setmarket(address adr) public onlyOwner(){
    market = adr;
}
```

## ● Contract owner can change swap settings

```
function setswapTokensAtAmount(uint256 amount) public onlyOwner {  
    swapTokensAtAmount = amount;  
}
```

## ● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {  
    emit OwnershipTransferred(_owner, address(0));  
    _owner = address(0);  
}
```

## ● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {  
    require(newOwner != address(0), "Ownable: new owner is the zero address");  
    emit OwnershipTransferred(_owner, newOwner);  
    _owner = newOwner;  
}
```

### **Recommendation:**

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

# CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found 1 HIGH issues during the first review.

# TOKEN DETAILS

## Details

Buy fees:	2%
Sell fees:	2%
Max TX:	N/A
Max Sell:	N/A

## Honeypot Risk

Ownership:	Owned
Blacklist:	Not detected
Modify Max TX:	Not detected
Modify Max Sell:	Not detected
Disable Trading:	Not detected

## Rug Pull Risk

Liquidity:	N/A
Holders:	Clean

# HALLOWEENFLOKI TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 100.00% (10,000,000,000,000.00 Tokens) of HalloweenFloki

Token Total Supply: 10,000,000,000,000.00 Token | Total Token Holders: 3

HalloweenFloki Top 10 Token Holders

Source: Etherscan.io

(A total of 10,000,000,000,000.00 tokens held by the top 10 accounts from the total supply of 10,000,000,000,000.00 token)

Rank	Address	Quantity (Token)	Percentage
1	<a href="#">0x263D75...34Ee7c1b</a>	8,565,000,000,000	85.6500%
2	<a href="#">0x71B575...51057641</a>	1,000,000,000,000	10.0000%
3	<a href="#">Null: 0x00...dEaD</a>	435,000,000,000	4.3500%

# TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
