```
function setFeePercent(uint256 taxFee) external onlyOwner {
    require(taxFee <= 5, 'Tax is too high');
    _taxFee = taxFee;

```

- Contract owner can change max tx amount (with threshold)

Min value can be set is 0.25% totalSupply

```
function setMaxTxAmount(uint256 maxTxAmount) external onlyOwner {

    require(_maxTxAmount > totalSupply().div(400), 'value too low');
}
```

## ● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {

    emit OwnershipTransferred(_owner, newOwner);  
    _owner = newOwner;  
}
```

## ● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {

### **Recommendation:**

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

# CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.
