

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

MetaWeb3

\$META

11/01/2024

TOKEN OVERVIEW

Fees

- Buy fees: 1%
- Sell fees: 1%

Fees privileges

- Can change fees up to 25%

Ownership

- Owned

Minting

- No mint function

Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and max wallet amount

Blacklist

- Blacklist function not detected

Other privileges

- Can exclude / include from fees
-

INTRODUCTION

FreshCoins (Consultant) was contracted by **MetaWeb3** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0x85d04e6ddcaa3271b56ed8c6b9dc2a674d47fd8e

Network: **Binance Smart Chain (BSC)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **11/01/2024**

AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Passed
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Low
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

OWNER PRIVILEGES

- **Contract owner can't mint tokens after initial contract deploy**
- **Contract owner can't exclude an address from transactions**
- **Contract owner can exclude/include wallet(s) from tax**

```
function excludeFromFees(address account, bool excluded) external onlyOwner{
    require(!_isExcludedFromFees[account] != excluded, "Account is already the value of 'excluded'");
    _isExcludedFromFees[account] = excluded;

    emit ExcludeFromFees(account, excluded);
}
```

- **Contract owner can change swap settings**

```
function setSwapTokensAtAmount(uint256 newAmount) external onlyOwner{
    require(newAmount > totalSupply() / 1_000_000, "SwapTokensAtAmount must be greater than 0.0001% of total supply");
    swapTokensAtAmount = newAmount;

    emit SwapTokensAtAmountUpdated(swapTokensAtAmount);
}
```

- **Contract owner can change fees up to 25%**

```
function updateBuyFees(uint256 _taxFeeOnBuy) external onlyOwner {
    taxFeeOnBuy = _taxFeeOnBuy;
    _totalFeesOnBuy = taxFeeOnBuy;

    require(_totalFeesOnBuy + _totalFeesOnSell <= 25, "Total Fees cannot exceed the maximum");

    emit UpdateBuyFees(taxFeeOnBuy);
}

function updateSellFees(uint256 _taxFeeOnSell) external onlyOwner {
    taxFeeOnSell = _taxFeeOnSell;
    _totalFeesOnSell = taxFeeOnSell;

    require(_totalFeesOnBuy + _totalFeesOnSell <= 25, "Total Fees cannot exceed the maximum");

    emit UpdateSellFees(taxFeeOnSell);
}
```

● Contract owner can change **taxWallet** address

Current value:

taxWallet: 0xc380A33F005d2DA2dae1d5Ed5C0CaB12284b447b

```
function changeTaxWallet(address _taxWallet) external onlyOwner{
    require(_taxWallet != taxWallet, "Tax wallet is already that address");
    require(_taxWallet != address(0), "Tax wallet cannot be the zero address");
    taxWallet = _taxWallet;

    emit TaxWalletChanged(taxWallet);
}
```

● Contract owner has ability to retrieve any token held by the contract

Native tokens excluded

```
function claimStuckTokens(address token) external onlyOwner {
    require(token != address(this), "Owner cannot claim contract's balance of its own tokens");
    if (token == address(0x0)) {
        payable(msg.sender).sendValue(address(this).balance);
        return;
    }
    IERC20 ERC20token = IERC20(token);
    uint256 balance = ERC20token.balanceOf(address(this));
    ERC20token.transfer(msg.sender, balance);
}
```

● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {
    require(newOwner != address(0), "Ownable: new owner is the zero address");
    emit OwnershipTransferred(_owner, newOwner);
    _owner = newOwner;
}
```

● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {
    emit OwnershipTransferred(_owner, address(0));
    _owner = address(0);
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

TOKEN DETAILS

Details

Buy fees:	1%
Sell fees:	1%
Max TX:	N/A
Max Sell:	N/A

Honeypot Risk

Ownership:	Owned
Blacklist:	Not detected
Modify Max TX:	Not detected
Modify Max Sell:	Not detected
Disable Trading:	Not detected

Rug Pull Risk

Liquidity:	N/A
Holders:	100% unlocked tokens

META TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 100.00% (100,000,000.00 Tokens) of MetaWeb3

Token Total Supply: 100,000,000.00 Token | Total Token Holders: 1

MetaWeb3 Top 10 Token Holders

Source: BscScan.com

(A total of 100,000,000.00 tokens held by the top 10 accounts from the total supply of 100,000,000.00 token)

Rank	Address	Quantity (Token)	Percentage
1	0xc380A3...284b447b	100,000,000	100.0000%

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
