

# SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

**Putin Inu**  
\$PUTIN

**12/07/2023**

# TOKEN OVERVIEW

---

## Fees

- Buy fees: 5%
- Sell fees: 5%

## Fees privileges

- Can change fees up to 25%

## Ownership

- Owned

## Minting

- No mint function

## Max Tx Amount / Max Wallet Amount

- Can't change max tx amount and max wallet amount

## Blacklist

- Blacklist function not detected

## Other privileges

- Can exclude / include from fees
-

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy ( RUG or Honeypot etc )

# INTRODUCTION

**FreshCoins** (Consultant) was contracted by **Putin Inu** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

**0x63c865564b59547A431f769B4b83bbF90146777D**

Network: **Binance Smart Chain (BSC)**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **12/07/2023**

# AUDIT OVERVIEW

Security Score

Static Scan

Automatic scanning for common vulnerabilities

ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passed
2	Reentrancy and Cross-function	Passed
3	Front running	Passed
4	Timestamp dependence	Passed
5	Integer Overflow and Underflow	Passed
6	Reverted DoS	Passed
7	DoS with block gas limit	Passed
8	Methods execution permissions	Passed
9	Exchange rate impact	Passed
10	Malicious Event	Passed
11	Scoping and Declarations	Passed
12	Uninitialized storage pointers	Passed
13	Design Logic	Passed
14	Safe Zeppelin module	Passed

# OWNER PRIVILEGES

- **Contract owner can't mint tokens after initial contract deploy**
- **Contract owner can't exclude an address from transactions**
- **Contract owner can exclude/include wallet(s) from tax**

```
function excludeFromFees(address account) external onlyOwner {
    require(
        !_isExcludedFromFees[account],
        "BABYTOKEN: Account is already excluded"
    );
    _isExcludedFromFees[account] = true;

    emit ExcludeFromFees(account);
}

function excludeMultipleAccountsFromFees(address[] calldata accounts)
    external
    onlyOwner
{
    for (uint256 i = 0; i < accounts.length; i++) {
        _isExcludedFromFees[accounts[i]] = true;
    }

    emit ExcludeMultipleAccountsFromFees(accounts);
}
```

- **Contract owner can exclude/include wallet from dividends**

```
function excludeFromDividends(address account) external onlyOwner {
    require(!excludedFromDividends[account]);
    excludedFromDividends[account] = true;

    _setBalance(account, 0);
    tokenHoldersMap.remove(account);

    emit ExcludeFromDividends(account);
}
```

- **Contract owner can change swap settings**

```
function setSwapTokensAtAmount(uint256 amount) external onlyOwner {
    require(
        amount > totalSupply() / 10**5,
        "BABYTOKEN: Amount must be greater than 0.001% of total supply"
    );
    swapTokensAtAmount = amount;
}
```

## ● Contract owner can change fees up to 25%

```
function setTokenRewardsFee(uint256 value) external onlyOwner {
    tokenRewardsFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setLiquidityFee(uint256 value) external onlyOwner {
    liquidityFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setMarketingFee(uint256 value) external onlyOwner {
    marketingFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}
```

## ● Contract owner can change `_marketingWalletAddress` address

Current value:

`_marketingWalletAddress`: `0xec9fea4ae59195c39348eb407b42a09d4a767c3c`

```
function setMarketingWallet(address payable wallet) external onlyOwner {
    require(
        wallet != address(0),
        "BABYTOKEN: The marketing wallet cannot be the value of zero"
    );
    require(!wallet.isContract(), "Marketing wallet cannot be a contract");
    _marketingWalletAddress = wallet;
}
```

## ● Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {
    require(newOwner != address(0), "Ownable: new owner is the zero address");
    _setOwner(newOwner);
}

function _setOwner(address newOwner) private {
    address oldOwner = _owner;
    _owner = newOwner;
    emit OwnershipTransferred(oldOwner, newOwner);
}
```

## ● Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {
    _setOwner(address(0));
}
```

### **Recommendation:**

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

# CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

# TOKEN DETAILS

## Details

Buy fees:	5%
Sell fees:	5%
Max TX:	N/A
Max Sell:	N/A

## Honeypot Risk

Ownership:	Owned
Blacklist:	Not detected
Modify Max TX:	Not detected
Modify Max Sell:	Not detected
Disable Trading:	Not detected

## Rug Pull Risk

Liquidity:	N/A
Holders:	100% unlocked tokens

# PUTIN TOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 100.00% (100,000,000,000.00 Tokens) of Putin Inu

Token Total Supply: 100,000,000,000.00 Token | Total Token Holders: 1

## Putin Inu Top 10 Token Holders

Source: BscScan.com

(A total of 100,000,000,000.00 tokens held by the top 10 accounts from the total supply of 100,000,000,000.00 token)

Rank	Address	Quantity (Token)	Percentage
1	<a href="#">0x578b9bb741b3a12cf177af8e6fba6ac566b1e4de</a>	100,000,000,000	100.0000%

# TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
