

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

TOKEN OVERVIEW

Fees

• Buy fees: 8%

• Sell fees: 8%

Fees privileges

Can change fees up to 25%

Ownership

Owned

Minting

No mint function

Max Tx Amount / Max Wallet Amount

• Can't change / set max tx amount or max wallet amount

Blacklist

Blacklist function not detected

Other privileges

· Can exclude / include from fees

DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website https://freshcoins.io

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy (RUG or Honeypot etc)

INTRODUCTION

FreshCoins (Consultant) was contracted by CACTUS (Customer) to conduct a Smart Contract Code Review and Security Analysis.

0x6034120575f3a4FDC03196128f4AD2011D570A96

Network: Binance Smart Chain (BSC)

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on 01/02/2023

AUDIT OVERVIEW

Static Scan Automatic scanning for common vulnerabilities

ERC Scan
Automatic checks for ERC's conformance

- 0 High
- 2 Medium
- 0 Low
- Optimizations
- o Informational

| No. | Issue description | Checking Status | |
|-----|--------------------------------|-----------------|--|
| 1 | Compiler Errors / Warnings | Passed | |
| 2 | Reentrancy and Cross-function | Passed | |
| 3 | Front running | Passed | |
| 4 | Timestamp dependence | Passed | |
| 5 | Integer Overflow and Underflow | Passed | |
| 6 | Reverted DoS | Passed | |
| 7 | DoS with block gas limit | Passed | |
| 8 | Methods execution permissions | Passed | |
| 9 | Exchange rate impact | Passed | |
| 10 | Malicious Event | Passed | |
| 11 | Scoping and Declarations | Passed | |
| 12 | Uninitialized storage pointers | Passed | |
| 13 | Design Logic | Passed | |
| 14 | Safe Zeppelin module | Passed | |

OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy
- Contract owner can't exclude an address from transactions
- Contract owner can exclude/include wallet(s) from tax

```
function excludeFromFees(address account) external onlyOwner {
    require(
    !_isExcludedFromFees[account],
        "BABYTOKEN: Account is already excluded"
    );
    __isExcludedFromFees[account] = true;
    emit ExcludeFromFees(account);
}

function excludeMultipleAccountsFromFees(address[] calldata accounts)
    external
    onlyOwner
{
    for (uint256 i = 0; i < accounts.length; i++) {
        __isExcludedFromFees[accounts[i]] = true;
    }
    emit ExcludeMultipleAccountsFromFees(accounts);
}</pre>
```

Contract owner can exclude/include wallet from dividends

```
function excludeFromDividends(address account) external onlyOwner {
    require(!excludedFromDividends[account]);
    excludedFromDividends[account] = true;

    _setBalance(account, 0);
    tokenHoldersMap.remove(account);

    emit ExcludeFromDividends(account);
}
```

Contract owner can change swap settings

```
function setSwapTokensAtAmount(uint256 amount) external onlyOwner {
    require(
        amount > totalSupply() / 10**5,
        "BABYTOKEN: Amount must be greater than 0.001% of total supply"
    );
    swapTokensAtAmount = amount;
}
```

Contract owner can change fees up to 25%

```
function setTokenRewardsFee(uint256 value) external onlyOwner {
    tokenRewardsFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setLiquiditFee(uint256 value) external onlyOwner {
    liquidityFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setMarketingFee(uint256 value) external onlyOwner {
    marketingFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}</pre>
```

Contract owner can change _marketingWalletAddress address

Current value:

_marketingWalletAddress: 0x3901a22d1181abbec87f41f71f9c086ce94b00c0

```
function setMarketingWallet(address payable wallet) external onlyOwner {
    require(
        wallet != address(0),
        "BABYTOKEN: The marketing wallet cannot be the value of zero"
    );
    require(!wallet.isContract(), "Marketing wallet cannot be a contract");
    _marketingWalletAddress = wallet;
}
```

Contract owner can transfer ownership

```
function transferOwnership(address newOwner) public virtual onlyOwner {
    require(newOwner != address(0), "Ownable: new owner is the zero address");
    _setOwner(newOwner);
}

function _setOwner(address newOwner) private {
    address oldOwner = _owner;
    _owner = newOwner;
    emit OwnershipTransferred(oldOwner, newOwner);
}
```

Contract owner can renounce ownership

```
function renounceOwnership() public virtual onlyOwner {
    _setOwner(address(0));
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found no HIGH issues during the first review.

TOKEN DETAILS

Details

Buy fees: 8%

Sell fees: 8%

Max TX: 100,000,000,000

Max Sell: N/A

Honeypot Risk

Ownership: Owned

Blacklist: Not detected

Modify Max TX: Detected

Modify Max Sell: Not detected

Disable Trading: Not detected

Rug Pull Risk

Liquidity: N/A

Holders: Clean

CACTUS TOKEN ANALYTICS& TOP 10 TOKEN HOLDERS

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
