

SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

TOKEN OVERVIEW

Fees

• Buy fees: 8%

• Sell fees: 8%

Fees privileges

• Can change fees up to 100%

Ownership

Owned

Minting

No mint function

Max Tx Amount / Max Wallet Amount

• Can't change max tx amount and/or max wallet amount

Blacklist

Blacklist function not detected

Other privileges

· Can exclude / include from fees

DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website https://freshcoins.io

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy (RUG or Honeypot etc)

INTRODUCTION

FreshCoins (Consultant) was contracted by

Doge Musk AI (Customer) to conduct a Smart Contract Code Review and

Security Analysis.

0xB6F9395fA0956854740994Bf1f35577EEe550611

Network: Binance Smart Chain (BSC)

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on 27/04/2023

AUDIT OVERVIEW

Security Score
HIGH RISK
Audit FAIL

- 1 High
- 3 Medium
- 0 Low
- Optimizations
- 0 Informational

No.	Issue description	Checking Status		
1	Compiler Errors / Warnings	Passed		
2	Reentrancy and Cross-function	Passed		
3	Front running	Passed		
4	Timestamp dependence	Passed		
5	Integer Overflow and Underflow	Passed		
6	Reverted DoS	Passed		
7	DoS with block gas limit	Passed		
8	Methods execution permissions	Passed		
9	Exchange rate impact	Passed		
10	Malicious Event	Passed		
11	Scoping and Declarations	Passed		
12	Uninitialized storage pointers	Passed		
13	Design Logic	Passed		
14	Safe Zeppelin module	Passed		

OWNER PRIVILEGES

- Contract owner can't mint tokens after initial contract deploy
- Contract owner can't exclude an address from transactions
- Contract owner can exclude/include wallet(s) from tax

Contract owner can exclude wallet from dividends

```
function excludeFromDividends(address account) external onlyOwner {
    require(!excludedFromDividends[account]);
    excludedFromDividends[account] = true;

    _setBalance(account, 0);
    tokenHoldersMap.remove(account);

emit ExcludeFromDividends(account);
}
```

Contract owner can change swap settings (without threshold)

```
function setSwapTokens(uint256 amount) external onlyOwner {
    swapTokensAtAmount = amount;
}
```

Contract owner can change fees up to 100%

```
function setBuyFees(
   uint16_dogereward,
   uint16_structure,
   uint16 burn
 ) external onlyOwner {
   buyFee.dogereward = _dogereward;
   buyFee.structure = _structure;
   buyFee.burn = _burn;
   totalBuyFee = buyFee.dogereward + buyFee.structure;
function setSellFees(
   uint16 _dogereward,
   uint16_structure,
   uint16 burn
 ) external onlyOwner {
   sellFee.dogereward = _dogereward;
   sellFee.structure = _structure;
   sellFee.burn = _burn;
   totalSellFee = sellFee.dogereward + sellFee.structure;
```

Contract owner can change structureWallet address

Current value:

structureWallet: 0x78ebe000c553612f5749331619bd52671d9abbbc

```
function setWallets(address payable _structure) external onlyOwner {
    structureWallet = _structure;
}
```

Contract owner can withdraw tokens from smart contract

(native tokens excluded)

```
function claimStuckTokens(address _token) external onlyOwner {
    require(_token != address(this),"No rug pulls");
    if (_token == address(0x0)) {
        payable(owner()).transfer(address(this).balance);
        return;
    }
    IERC20 erc20token = IERC20(_token);
    uint256 balance = erc20token.balanceOf(address(this));
    erc20token.transfer(owner(), balance);
}
```

Recommendation:

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.

CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found 1 HIGH issues during the first review.

TOKEN DETAILS

Details

Buy fees: 8%

Sell fees: 8%

Max TX: 1,000,000,000

Max Sell: N/A

Honeypot Risk

Ownership: Owned

Blacklist: Not detected

Modify Max TX: Not detected

Modify Max Sell: Not detected

Disable Trading: Not detected

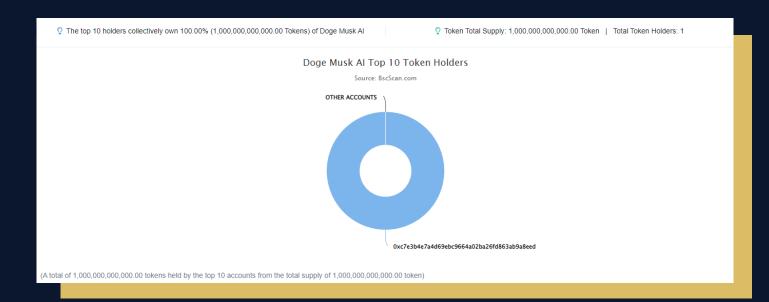

Rug Pull Risk

Liquidity: N/A

Holders: 100% tokens unlocked

DMUSKTOKEN ANALYTICS & TOP 10 TOKEN HOLDERS

Rank	Address	Quantity (Token)	Percentage
1	0xc7e3b4e7a4d69ebc9664a02ba26fd863ab9a8eed	1,000,000,000,000	100.0000%

TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
